Table of Contents

1. About Environment Reporter (ER)

Environment Reporter (ER) is a utility that analyses your system build environment and creates a report for internal and external use. The ER does not transmit any information without your explicit permission and you may edit the report prior to submission to Programming Research.

2. Installation Note

Environment Reporter is a utility that do not require to be installed.

User can run ER in Graphical User Interface (GUI) mode by simply double click or Command line Interface mode (CLI) by specifying –cli option.

3. Command Line Help

USAGE: EnvironmentReporter [OPTIONS]
PRQA Environment Reporter Application

-h, --help   Display help information on command line arguments
-l<level>, --log-level=<level>   Define log level (error/debug/warning/information)
--gui   Set GUI mode if possible, otherwise fall-back to command line version (default)
--cli   Force command line interface

4. Changes for this release
Initial Version (V1.0)
